1 Basic Tables

The tabular environment is used to create tables.

Course Code	**Semester**	**Course Name**
22CST201	III	Data Communications
22CST202	III	Design and Analysis of Algorithms
22CST203	III	Digital Circuits and Microprocessors
22CST204	III	Mathematics for AI
22CST205	III	Object Oriented Analysis and Design
22CST206	III	Technical Writing
22HST201	III	Social Sciences and Professional Ethics

Table 1: Third Semester Courses at MNIT Jaipur

Table 1 shows the courses of Semester III.

2 Advanced Tables

2.1 Multicolumn

MNIT Jaipur - Semester III		
Course Code	Semester	Course Name
22CST201	III	Data Communications
22CST202	III	DAA

Table 2: Example of Multicolumn

2.2 Multirow

2.3 Table Positioning

The table placement options control where LaTeX tries to place a table.

Semester	Course Code	Course
III	22CST201	Data Communications
	22CST202	DAA
	22CST203	Digital Circuits

Table 3: Example of Multirow

- h: Here
- t: Top of the page
- b: Bottom of the page
- p: Separate page for floats
- !: Relax placement restrictions

3 Colors in LaTeX

3.1 Basic Text Colors

Red Text

Blue Text

Green Text

Violet Text

Custom Blue Text

3.2 Defining Custom Colors

Custom colors can be defined using RGB and HTML values.

This text uses an HTML-defined color.

This text uses an RGB-defined color.

3.3 Colored Mathematical Expressions

$$E = mc^2$$

$$\sum_{i=1}^{n} i$$

$$\int_0^1 x^2 \, dx$$

4 Colored Tables

The xcolor package with the table option allows us to add colors to table rows and cells.

4.1 Colored Rows

Course Code	Semester	Course Name
22CST201	III	Data Communications
22CST202	III	Design and Analysis of Algorithms
22CST203	III	Digital Circuits and Microprocessors
22CST204	III	Mathematics for AI

Table 4: Table with Colored Rows

4.2 Colored Cells

Course	Semester	Status
Data Communications	III	Completed
DAA	III	Ongoing
Digital Circuits	III	Pending

Table 5: Table with Colored Cells
